

**Javascript**  
**NCP - CSE-F**  
**Employee PayRoll Management System**

Step 1: Design a WebPage given below.

The image shows a web form titled "ADD NEW EMPLOYEE" in a stylized blue font. The form has a light orange background. It contains five input fields with red labels: "Employee Id" (text input with "107"), "Employee Name" (text input with "shofia"), "Qualification" (text input with "10"), "Designation" (dropdown menu with "SalesBoy" selected), and "Salary" (text input with "1000"). At the bottom, there are two buttons: "Add Record" and "Exit".

1. Use HTML5 elements "Header" and "Main" for designing above webpage. Header element must contain "ADD NEW EMPLOYEE" and the Main element must contain rest of the webpage. (5 Marks)
2. The "Add Record" Button can be used to validate the filled form. Also give directions to the users when errors occurred. (5 Marks)
3. Apply following constrains in JS to validated the user input. (10 Marks)
  - Check the Employee Id is a number and No characters or alpha numerals are allowed.
  - Check the Employee name has only the characters and No numeric values are allowed
  - Qualification field can accept both the numeric value as well as text
  - Salary field must be a number No character data are allowed.
  - Use external style sheet for applying background colour and font details.
4. When all the details submitted by the user are correct redirect the user to Congratulation page otherwise the ask user to reenter the correct details. (10 Marks)
5. Reset the form details using the "Exit" button. (5 Marks)
