2. Create the following page (P2)

## Create a new Google Account

### Your Google Account is more than just Gmail.

Talk, chat, share, schedule, store, organize, collaborate, discover, and create. Use Google products from Gmail to Google+ to YouTube, view your search history, all with one username and password, all backed up all the time and easy to find at (you guessed it) Google.com.

### Take it all with you.

A Google Account lets you access all your stuff — Gmail, photos, and more — from any device. Search by taking pictures, or by voice. Get free turn-by-turn navigation, upload your pictures automatically, and even buy things with your phone using Google Wallet.

### Share a little. Or share a lot.

Share selectively with friends, family (maybe even your boss) on Google+. Start a video call with friends, send a message to a group all at once, or just follow posts from people who fascinate you. Your call.

3. Create a page that integrates P1 and P2 such that the form occurs to the right and the content shown in P2 occurs to the left of the form.

4. Add the following at the bottom of the page with appropriate html elements
